**Exam** : **NSE5\_FWB\_AD-8.0**

**Title** : Fortinet NSE 5 - FortiWeb  
8.0 Administrator

**Version** : DEMO

1. An e-commerce site reports credential stuffing on /login.

Which FortiWeb feature is the best immediate fit?

- A. Configure HA heartbeat timers
- B. Disable HTTPS offloading
- C. Disable signatures to reduce CPU load
- D. Bot mitigation policy applied to the login URL

**Answer: D**

2. What is the primary purpose of FortiWeb API discovery in an environment where teams frequently publish new endpoints?

- A. Automatically rotate API keys on a fixed schedule
- B. Automatically identify API endpoints from observed traffic to improve visibility and policy creation
- C. Replace backend API gateways and service meshes
- D. Encrypt all API responses with a Fortinet-managed key

**Answer: B**

3. FortiWeb mentions that some DoS protections rely on tracking client requests.

What feature category supports that tracking?

- A. HA heartbeat used to track active elections
- B. Report scheduling used to track monthly exports
- C. Client management used to track request behavior
- D. Certificate store used to track key usage

**Answer: C**

4. Which approach best reduces the risk of false positives when enabling application-layer DoS controls?

- A. Set the lowest possible thresholds globally for all URLs
- B. Baseline normal traffic patterns and tune thresholds per URL/behavior
- C. Disable logging to reduce alert noise
- D. Turn off client tracking to avoid storing state

**Answer: B**

5. A FortiWeb admin wants to ensure traffic reaches an alternate backend if all pool members fail health checks. Where is this behavior typically defined?

- A. In FortiGuard licensing settings
- B. In web server / server pool definitions that support fallback routing behavior
- C. In the HA heartbeat election settings
- D. In the global DNS resolver settings

**Answer: B**
